Information Disclosure Statement

1. The information disclosure statement filed April 1, 2004 and June 21, 2004 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language.

The English abstract of the 08-108701 reference is not sufficient to enable an understanding of the reference since the single drawing provided is poorly reproduced.

The information disclosure statements have been placed in the application file, but the information referred to therein has not been considered.

2. The disclosure is objected to because of the following informalities:

The reference to the claims on pages 4 and 5 must be deleted because such reference is improper for the specification, and because the claim language is likely to change during the prosecution of the application.

Appropriate correction is required.

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter.

The specification does not appear to have a definition of what is meant by the "constitution" as the term appears in claim 2.

See 37 CFR 1.75(d)(1) and MPEP § 608.01(o).

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, in line 5 it is not clear why only hole is being referred to as receiving a hub nipple. In line 7 it is not clear if the hub nipple referred is the same as one set forth earlier in the claim.

In claim 2 the "constitution" lacks antecedent basis.

In claim 3 it is not clear what is meant by the phrase "is not less than one time."

In claim 4 the phrase "are that the length thereof " is vague, confusing, and grammatically poor.

In claim 7 the phrase "is the same as or somewhat shorter than or longer than" is indefinite as the metes and bounds of the term "somewhat shorter" cannot be determined, and also because the phrase does not appear to limit the length of the nipple which would have to be one of the same, longer than, or shorter than any dimension as there are no other possibilities.

Allowable Subject Matter

6. Claims 1-9 would appear to be allowable over the prior art of record if rewritten or amended to overcome the rejections under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references show bicycle wheel hubs and spoke connections.
